Misc. Request: New Subject Code		
Request	**Notes**	**Effective Term**
CONE: Construction Engineering	The Department of Construction Management and the Department of Civil and Environmental Engineering are now completing a proposal for a new, jointly-administered baccalaureate program in Construction Engineering. This proposed program of study combines content from both departments and augments those fundamental courses with Construction Engineering - specific and specialized courses. These specific courses will be designated with the CONE subject code for the following reasons: 1. The differentiated code signifies program courses, which are distinctive to the degree and allow enrollment based on prerequisites and in most cases program admission. 2. The course elevates the program identity for students in the program, allowing students to differentiate themselves - particularly with career tracking and demonstrating accountability for associated KSAs with industry recruiters. 3. Administrative simplicity in describing program requirements and maintenance of program and course documentation.	Spring 2024
